

**Craig A. J. Fisher** is a Senior Research Scientist at the Japan Fine Ceramics Center in Nagoya, Japan. He obtained his B.Eng. in 1992 from the University of New South Wales, Australia, and D.Phil. in 1996 from the University of Oxford. He has spent time working at the Australian Nuclear Science and Technology Organisation and Ecole Nationale Supérieure de Chimie de Lille, France, as well as the University of Surrey and University of Bath in the U.K. His chief interests are first-principles calculations and atomistic modeling of functional materials, with a particular emphasis on interface structures and related phenomena.
