

Dr. Jiemin WANG is an associate professor in Institute of Metal Research (IMR), Chinese Academy of Sciences (CAS). He earned B. S. degree from China University of Mining and Technology in 2005 and received his Ph. D. degree in materials sciences from IMR in 2011. He worked in High-performance Ceramics Division (merged to form new Advanced Ceramics and Composites Division in 2018) in IMR firstly as assistant professor from 2011 to 2015 then as associate professor from 2015 up to now. His research is focused on theoretical investigation of phase stability, defect structures, mechanical properties, thermal properties of advanced carbides/nitrides ceramics using first principles method. Dr. Jiemin WANG has authored/co-authored more than 40 publications on journals, presented 15 oral presentations.
