

Dr. Xingang Luan, Associate Professor of School of Materials Science and Engineering at Northwestern Polytechnical University (NPU), Chinese director of NPU-TU Darmstadt Joint International Research Laboratory of Ultrahigh Ceramic Matrix Composites. He gained his M. S. and Ph. D. degrees in Material Science and Engineering at NPU in 2002 and 2007, respectively. He worked as a visiting scientist in TU Darmstadt from July 2012 to July 2013. His current research activities focused on oxidation, corrosion, hydrothermal corrosion, stressed oxidation and ablation of high and ultra-high temperature composites such as C/C, C/SiC, self-healing C/SiC, and SiC/SiC; preparation of ultra-high temperature ceramic matrix composites (UHTCMCs) by PDC and CVI methods. He has published over 75 scientific papers and 8 patents.
