

Professor Zhangwei Chen, is currently the executive director of the Additive Manufacturing Institute at Shenzhen University. He is now a member of the American Ceramic Society, a board member of the Chinese Ceramic Society Testing Branch, a senior member of Chinese Society of Mechanical Engineering and Chinese Society of Micro-Nanotechnology. He also serves as Editorial Board members for Journal of Advanced Ceramics, Frontiers in Materials and Nanoscience, Chinese Journal of Materials Engineering, and Chinese Journal of Precision Molding Engineering.

Prof. Chen holds a Ph.D. from Imperial College London (2014), with his PhD thesis awarded the prestigious John Kilner Prize. He has been working on the fields of non-metallic materials and components, involving materials processing, advanced manufacturing and characterizations etc. He has spent over 10 years particularly on the research of 3D printing of ceramics and the property-structure relationships. Prof. Chen has involved in a number of projects in China and the UK, supported by NSFC, EPSRC UK, Guangdong Province and Shenzhen City.

Prof. Chen has published about 40 peer-reviewed articles in a number of top international peer-reviewed journals including Acta Materialia, Journal of the European Ceramic Society, Journal of the American Ceramic Society, Ceramics International etc. Some have been selected as front cover articles, feature articles.
