

Diletta Sciti – Short Bio

Diletta Sciti is senior researcher and project leader at the Institute of Science and Technology for Ceramics (ISTEC). Her activity is mainly focused on processing and characterization of structural ceramics and UHTCs (monolithic, particulate and fibre - reinforced) for high temperature and severe environment applications.

In the last decade she has led several national and international research projects and contracts with Italian companies for R&D activity and technology transfer. She is project leader in a large EU H2020 collaborative research project focused on UHTCMC materials for extreme environment. She is author of about 190 papers in peer review journals and 9 patents.
