

Dr. Huimin Xiang is currently a senior engineer of Science and Technology on Advanced Functional Composite Laboratory, Aerospace Research Institute of Materials and Processing Technology. He received his PhD degree in Materials Sciences from Institute of Metal Research, Chinese Academy of Sciences in 2013. His research interests focus on the understanding the structure-properties relationship and design of novel high temperature and ultra-high temperature structure ceramics theoretically and experimentally. He has published more than 60 peer-reviewed papers, 5 chinese patents and has delivered several invited talks on international conferences.
