

Geyu Lu, Professor and Dean of electronic science and engineering college, Jilin University. In 1985 and 1988, he received his bachelor and master's degrees in semiconductor chemistry from Jilin university. In 1998, he received his Dr. Eng. degree from kyushu university, Japan, and then as a researcher, professor/senior researcher in Yamazaki institute of technology, Japan. In 2006, he was promoted as a full professor (winner of national outstanding youth science fund) in Jilin university, China. His research interests have been focused on micro-nano gas/humidity/flexible sensors and systems, new photovoltaic devices and research of electronic function materials. So far, he has published over 330 scientific papers in famous international journals, including over 185 papers on Sens. Actuators B Chem., which have been cited more than 8000 times, H-factors: 50. He owns one international invention patent and 35 China's national invention patents, two of which have been transferred to enterprises. He won First prize of Jilin province natural science (First person, 2017), Quality improvement excellence award in Yamazaki institute of technology, Japan (2004), Top quality award in Tokyo gas company of Japan (2005).
