

CV of Jun Zhang

Dr. Jun Zhang is currently an associate professor of College of physics, Qingdao University, China. He received his PhD from Nankai University in 2011 in China. During 2014-2015 he worked with Prof. Nicola Pinna in Humboldt University, Berlin, Germany. The research of his group is focused on the elaboration of micro/nanostructured materials by means of chemical (hydrothermal, solvothermal and atomic layer deposition) and physical (E-beam and thermal evaporation) techniques. The physicochemical properties of the synthesized nanostructures are mainly investigated for application in chemical gas sensor. He has published over 70 peer-reviewed papers with a personal H-index of 44, and one book chapter and three patents.
