

Minghui Yang FRSC is a Professor at the Ningbo Institute of Materials Technology & Engineering (NIMTE) of the Chinese Academy of Sciences (CAS). He received B.A. and M. Chem. degrees from University of Liverpool and completed his Ph.D. in Materials Chemistry under the supervision of Professor J. Paul Attfield at University of Edinburgh in 2010. This was followed by a postdoctoral appointment in the Department of Chemistry and Chemical Biology at Cornell University, where he worked on nano-structured solid state functional materials with Professor Francis J. DiSalvo. He has received several awards for his work including the China National "Thousand Talents" Award for Distinguished Professorship (2013), Chinese Academy of Sciences (Shenyang) Young Distinguished Scientist (2014), Liaoning Research Prize (2015), Zhejiang "Thousand Talents" Award (2016) and Ningbo Leading Scientist Prize (2017), and Zhejiang National Science Fund for Distinguished Young Scholars (2019). He has 145 publications to his credit including those in *Nature Materials*, *Nature Chemistry*, *Journal of the American Chemical Society*, *Energy & Environmental Science*, *ACS Nano*, etc. He held more than 30 patents and 1 PCT patent. He is the group leader for Solid State Functional Materials Lab at CAS. His current research is centred on solid state functional materials for catalysis and sensing applications.
