

Yuchi Fan received his Bachelor's degree from Wuhan University of Technology and Master's degree from Shanghai Institute of Ceramics, Chinese Academy of Sciences. After receiving PhD in Materials Processing from Tohoku University (TU), he continued to work as JSPS fellow in Prof. Akira Kawasaki's laboratory at TU. Then he joined Prof. Tatsumi Ishihara's laboratory at Kyushu University as a research fellow.

Now he is a full-professor at Donghua University. His research focuses on the design and preparation of two-dimensional materials based ceramic composites applied for thermoelectrics, microwave absorbing materials and so on. He has coauthored more than 40 peer review papers, many of which have been published in high-ranked journals such as *Adv Energy Mater*, *Adv Funct Mater*, *Small*, *Acta Mater*, *Carbon*, etc.
