

Sang-Young Lee is professor and a head of School of Energy and Chemical Engineering at UNIST, and a CTO of ubatt (a start-up company spin-off from UNIST), Korea. He received BA in Chemical Engineering from Seoul National University in 1991, MS, and PhD in Chemical Engineering from KAIST in 1993 and 1997. He served as a postdoctoral fellow at Max-Planck Institute for Polymer Research from 2001 to 2002. Before joining UNIST, he worked at Batteries R&D, LG Chem as a principal research scientist. His research interests include printed all-solid-state batteries, flexible/wearable batteries, cellulose-based paper batteries, advanced separator membranes and single-ion conductors.
