

Prof. Bo Hou is a Lecturer of Optoelectronic at the School of Physics and Astronomy, Cardiff University. He received his PhD degree in the School of Chemistry at the University of Bristol (2010–2014) and worked as a postdoctoral researcher at the University of Oxford (2014-2018) and a Senior Research Fellow at the University of Cambridge (2018-2020). His research interests include nanomaterial synthesis, quantum dot optoelectronics, and electron microscopy (TEM). He has extensive research expertise and knowledge in the optoelectronics and device physics. He has a strong track record of research excellence (citations>800, h-index=17). Since 2013, he has published over 50 papers in first-rate peer-reviewed journals and 4 industrial patents in inorganic nanomaterial growth and their optoelectronics and energy applications.
